

Pipe Flow Software ( [www.pipeflow.com](http://www.pipeflow.com) ) is in a process of donating the licenses for its premier Pipe Flow Expert software program to allow SPCE students to complete pipe system designs and pressure drop calculations. The Pipe Flow Expert software will allow the students to calculate flow rates, pressure drops and pumping requirements in order to check results against their own piping calculations.

SPCE appreciates the initiative of Pipe Flow Software for providing this valuable help to the students.
