

3-Day DELMIA TRAINING in association with TATA TECHNOLOGIES from 16th to 18th April 2015

3-Day Digital Enterprise Lean Manufacturing Interactive Application (DELMIA) Training program was organized by Department of Mechanical Engineering for the students of Mechanical Engineering. This program was aimed to cover the basics of Digital Enterprise Lean Manufacturing Interactive Application (DELMIA). The training was given by experts from TATA TECHNOLOGIES, PUNE. Students received the training very well. Students benefitted from this training. The students were able to add robots from the repository of available robots in the software in the virtual environment and were also able to give pick and drag movements to the robot.
